

## Call for Presentations

### ***2022 Southeast New York Stormwater Conference and Trade Show***

Fall 2022

The Southeast New York Stormwater Conference and Trade Show is on once again for 2022. Based on the feedback that Lower Hudson Coalition of Conservation Districts (LHCCD) received about our virtual conferences in 2020 and 2021, we're keeping this option open. We're also exploring opportunities for an in-person gathering. As always, the conference will provide an opportunity for municipal officials and staff as well as stormwater professionals to learn about stormwater management and related subjects from experts working in southeast NY and beyond. The LHCCD is currently accepting proposals for presentations. Topics should be generally related to stormwater management, and could include:

- Strategic planning for green infrastructure siting, implementation and maintenance
- Incorporating Justice, Equity, Diversity and Inclusion (JEDI) into green infrastructure projects
- Design/construction of green infrastructure practices
- Maintenance/monitoring of green infrastructure practices
- Implementing MS4 programs/6 Minimum Control Measures
- Riparian restoration and management techniques
- Watershed and stream management
- Policy/regulatory aspects of stormwater management
- Erosion and sediment control techniques
- Flood hazard mitigation/climate resilience-building related stormwater management

***Please do not feel limited by this list! We welcome any ideas you may have for presentation topics.***

Interested presenters should submit a proposal to LHCCD Coordinator Michael Jastremski at [mj.lhccd@gmail.com](mailto:mj.lhccd@gmail.com) by Close of Business on July 29th, 2022. Preference will be given to proposals received before this date. Please use the following guidelines when developing your proposal:

- Include a title, presenter(s) name(s) and affiliation(s), and a 1-2 paragraph abstract.
- Target audiences for the conference include municipal officials and staff, state and federal agencies, design professionals, and construction contractors. Please indicate if your presentation is geared towards any of these audiences in particular.
- Case studies are encouraged where they provide regionally applicable results or lessons learned.
- Presentations should be scalable to 30 or 60 minutes in length.
- Presentations that are intended solely to promote a specific product or business will not be selected.
- Presenters are offered complimentary admission to the conference. No other compensation or reimbursement is available.

Proposals will be reviewed by the conference planning committee of the LHCCD. Notifications will be sent via email as proposals are selected.
